

Say NO to BPL

Please do not pass this BPL garbage, I do not need the Spammers who will make the most \$\$ from this assaulting my computer over the power lines.

This will cause detrimental effects on Amature Radio, Which is part of Home Land Security. It will also cause problems with police and military frequencies.. Y this will basicall turn the countries power grid in to a several hundred thousand mil long antenna, broadcastin rf signals.

we don't need it , you can get dsl, cable , dial up and satalite connections to the internet for the same price, this is crazy, japan and austria have already tried and cancelled this stuff. It is not necessary, is in violation of part 15, and will ruin ham radio.for a couple more rich guys to get more money. do the technical researsh, then say NO to BPL
